

# ESG Data for sustainable investment decisions

**Infront ESG Module gives you access to the most comprehensive ESG data universe in the industry and innovative tools to help you integrate sustainability and optimize the impact of your investment decisions and recommendations.**

**Together with Clarity AI, we bring you a science based and quantitative approach to ESG that leverages high quality data from more than 65 data sources.**

- The largest ESG databases in the industry with 30,000+ companies, 200,000+ funds, 400+ countries and governments
- Quality data & science-based methodology sourced from more than 65 data providers
- One unified way of measuring ESG making it easy to compare investments and portfolios

## Making ESG a part of your workflow

The Infront ESG Module supports your entire ESG process. It starts with the smooth implementation of comprehensive data into your infrastructure and workflow, directly into your Infront solutions or via Infront Data Manager feeds. Standardized interfaces ensure hassle-free connections to your IT landscape as well as a stable and secure data transfer.

Powerful tools for screening and analysis give you the insights you need on sustainable investments. And since Infront ESG Module is widget-based, you can easily create your own workspace combining ESG insights with other relevant widgets for market data, news or analytics display.

ESG templates simplify regulatory reporting and compliance. Consolidate the necessary data and results to compile coherent, professional documentation for profiling, pre- and post-trade compliance, and reporting for general interest in sustainability, disclosure regulation, MiFID II, and EU taxonomy.

Showcase your company's ESG data and initiatives with ESG overviews and customized reporting to keep your customers and investors informed.

## Infront ESG Proposition

### 1. DATA

To support you in integrating ESG into your work, Infront ESG risk scores will be made available in all Infront products. Using a unique cross-asset scoring methodology, we make it easy for you to compare investments and portfolios.

#### Detailed ESG scores

Three levels deep with 18 scores, you get a detailed overview of the company/fund to understand the drivers.

#### ESG integration

ESG risk scores can be incorporated into any workflow to support the transition to a more sustainability-aware world.

#### Multiple assets

Get ESG scores for companies, funds, governments and bonds.\*

### 2. FUNCTIONALITY AND TOOLS

Infront ESG Module equips you with tools and features to manage every aspect of your ESG process.

#### Company ESG analysis

Understand the underlying drivers, benchmark against our industry scores, and compare against industry peers.

#### Industry intelligence

Get the full picture with our aggregated ESG industry scores. Our industry ESG functions allow you to compare industries and constituents and benchmark across industry and sectors.

#### Screening

With Clarity AI ESG risk scores, you can easily screen across industries to generate ideas that fit your requirements.

#### Portfolio ESG analysis

Understand how your investments impact sustainability with Infront Portfolio Manager. Integrated scores and client reporting tools enable an effective communication with investors.

\*Bonds available at a later stage

## Unique scoring methodology

Clarity AI ESG risk scores use a unique scoring methodology. In addition to environmental risk, the scores also measure company behaviour and the impact their products and services have on society. The methodology is based on scientific research, quantitative assessment and global preferences.

Many years of proprietary research and analysis by experts in the field have led to Clarity's development of a sound methodology and automated score calculation process unlike any other methodology currently used in the market.

Financial professionals across Europe and South Africa rely on Infront for flexible financial market solutions.

Our solutions serve 3,600 customers with over 90,000 professional users. With support for their complete workflow, financial professionals can manage investment decisions, reduce costs, adapt to fast-changing market requirements and work more efficiently with ever-increasing amounts of information – quickly, easily and flexibly.
